

Igor Rohal

SENIOR SOFTWARE ENGINEER

Profile

- 8+ years of experience in designing, developing, and delivering back- end software components
- Built e-commerce projects using the microservices architectural pattern, deployed and available on-demand in the cloud (Software as a Service)
- Skills and interest in distributed software architecture, reactive event-driven software, CI/CD pipelines, and cloud deployments (Jenkins as a Service, Cloud Foundry, Kubernetes)
- Effectively utilized agile development practices (Scrum, Kanban) in self-organizing, independent, cross-functional teams

Employment History

Senior Software Developer, SAP CX, Munich, Germany

JANUARY 2016 – MARCH 2020

- Designed, developed, deployed, and monitored cloud-native software components written in Java 8 - Java 11 (tens of resilient and scalable microservices)
