

# Igor Rohal

BACKEND SOFTWARE ENGINEER

## Profile

- Experienced in designing, developing, and delivering back-end software components
- Built e-commerce projects using the microservices architectural pattern, deployed and available on-demand in the cloud (Software as a Service)
- Skills and interest in distributed software architecture, reactive event-driven software, CI/CD pipelines, and cloud deployments (Jenkins as a Service, Cloud Foundry, Kubernetes)
- Effectively utilized agile development practices (Scrum, Kanban) in self-organizing, independent, cross-functional teams

## Employment History

### Backend Developer, Camunda Services, Remote

FEBRUARY 2021 – MAY 2021

- Developed, deployed, and monitored the backend part of [Cawemo](#) SaaS solution - a web-based collaborative solution for modeling business processes using the BPMN 2.0 standard notation.
- Used technologies: Java 11, Spring Boot 2, Pusher, PostgreSQL, Kubernetes, AWS, Github Actions, Jenkins

### Senior Software Developer, SAP CX, Munich, Germany

JANUARY 2016 – MARCH 2020

- Designed, developed, deployed, and monitored cloud-native software components written in Java 8 - Java 11 (tens of resilient and scalable microservices)
- Deployed to Cloud Foundry and Kubernetes on AWS (Infrastructure as Code)
- Participated in technical interviews to hire new software engineers and leading more junior developers of the team

### Software Developer, SAP CX, Munich, Germany

NOVEMBER 2013 – DECEMBER 2015

- Designed, developed, tested, deployed, and monitored back-end software components written in Java 8 and Spring Framework

## Education

### Czech Technical University, Prague, Czech Republic

2006 – 2012

Master's degree in Computer Software Engineering

### KTH Royal Institute of Technology, Stockholm, Sweden

2010

Erasmus Exchange Programme in Software Engineering

## Courses in Progress

Ultimate AWS Certified Developer Associate 2021, Udemy (Stephane Maarek)

## Details

Neusäß

Germany
